"Withdraw that accusation at once!" "It's how the Chironians have been working all along," Lechat said. "They've been doing everything in their power to entice as many people as possible away from the opposition and effectively over to their side. Haven't they done it with us? When they're down to the last handful who'll never be able to think the way the Chironians think, they'll get rid of them, just as they did Padawski. That's how their society has always worked. When it comes down to the last few who won't be sensible no matter what anybody does, they don't fool around. And they'll do the same thing with the ship if Stern makes one threatening move with those weapons up there. I'm convinced of it. The Chironians took out their insurance a long time ago. That would be typical of how they think too." Sirocco climbed back onto the platform to stand in front of the sketches that he had been using earlier, and gazed around for a few seconds while he waited for everybody's attention. "Well, you'll all be pleased to hear that our resident larceny, counterfeiting, and code-breaking expert has proved himself once again," he announced. "Phases one and four appear to be feasible, as we discussed." To one side and below the platform, Stanislaw turned with a broad, toothy grin and clasped his hands above his head to acknowledge the chorus of murmured applause and low whistles, rendered enthusiastically, but quietly enough not to attract undue attention to the block at that time of the. Hence the Bang and everything that came after it could turn out to be the result of an energy concentration that occurred for whatever reason in a regime governed by qualitatively different laws that we're only beginning to suspect. And that's what my line of research is concerned with. searching, cunning and indefatigable. Roughly 35 percent of Chiron's surface was land, the bulk of it distributed among three major continental masses. The largest of these was Terranova, a vast, east-west sprawling conglomeration of every conceivable type of geographic region, dominating the southern hemisphere and extending from beyond the pole {o cross the equator at its most northerly extremity. Selene, with its jagged coastlines and numerous islands, was connected to the western part of Terranova via an isthmus that narrowed to a neck below the equator; Artemis lay farther to the east, separated by oceans. Wellesley looked at Slessor, who, while still showing. signs of apprehensions--appeared curiously to feel relieved at the same time. Wellesley nodded heavily. "Very well. Proceed on that basis, John. Brief trills of laughter escaped Sinsemilla. Not brittle and mad laughter, as Micky might have expected. The other two followed his gaze to a Chironian wearing coveralls and a green hat with a red feather in it, painting the lower part of a wall of one of the houses. Near him was a machine on legs, a clutter of containers, valves, and tubes at one end, bristling with drills, saws, and miscellaneous attachments at the other. A ground vehicle with a multisectioned extensible arm supporting a work platform was parked in front; and from a few yards to one side of the painter, a paint-smearing robot, looking very much like an inexperienced apprentice, watched him studiously. The Chironian was as old as any that Colman had seen, with a brown, weathered face, but what intrigued Colman even more was the house itself, which was built after the pattern of dwellings on Earth a hundred years earlier--constructed from real wood, and coated with paint. It was not the first such anachronism that he had seen in. Franklin, where designs three centuries old coexisted quite happily alongside maglev ears and genetically modified plants,

but he hadn't had an opportunity to stop and study one before. "I'm not so sure I agree," Swley said, which meant that he did. Stanislaw stood back from the compack and announced that the changes were completed. Sirocco peered at the screen, checked the entries in the revised schedule that Stanislaw had produced, and nodded. He looked up at Colman and Driscoll, who were waiting by the still open emergency door. "Okay, the last ball's rolling," he told them. "On your way. Good luck." Fallows stood awkwardly and began moving toward the door. When he was halfway there he stopped, hesitated, then turned round again. "Sir, there's just one thing I'd like--". sort of the way college students go to Fort Lauderdale every spring break. And isn't it amazing, really, her rage. She'd become a drinker because booze inflamed the anger, and for so long she'd cherished her. Marcia Quarrey, the Director of Commerce and Economic Policy, didn't look too happy at the suggestion as she sipped her cocktail. "Obviously that would be possible," she said, setting down her glass. "But would it serve any useful purpose? The contingency plans were made to allow for the possibility of opposition. Well, there hasn't been any opposition. What's the sense in throwing good business and growth prospects away by provoking hostilities needlessly? We can acquire Franklin simply by walking in. We don't have to make a demonstration out of it." "Oh, I was in the Engineer Corps for a while, and I guess I picked a lot up here and there." If she had been with Farnhill's party inside, she was obviously more than just a go-fer. Why in hell did she come out to the parking lot to be nice to the troops? of the moon, supersecret human and alien crossbreeding programs, saucer-eyed gray aliens who can. "I've never heard of him," Micky said. of the time, or at least when medicated, which was in fact most of the time. Of course, you had to. "I told you once already, it's none of your business anymore. Leave me alone. I don't want to talk to you. Just go away and leave me alone." The Assistant Deputy Director of Engineering at last sat back and descended from his loftier plane of thought. "Ah, yes, Fallows." He gestured toward the screen he had been studying. "What do you know about this man Colman who's trying to get himself out of the Army and into Engineering? The Deputy has received a copy of 'the transfer request filed with the Military and passed it along to me for comment. It seems that this Colman has given your name as a reference. What do you know about him?" The inclined chin and the narrowing of the Gothic eyebrows were asking silently why any self-respecting echelon-four engineering officer would associate with an infantry sergeant. "That's my whole point," Bernard told them. "They're." Now, what would a handsome sergeant like you be up to in the Baltimore module? A tense silence fell. Then Jay said, "I know at least one person in the Army who we can trust." The others looked at him in surprise. "I hope so too," Kath said with feeling. "I ought to go now and see them off. Take care, Leon." And then Jay, who had been looking from one to the other, walked back to his father and started to talk persuasively in a low voice. Bernard hesitated, looked across at Colman again, and then took a deep breath and came haltingly across with lay beside him. "It's been a long time," he mumbled. His eyes wandered away and then came back to look Colman directly in the face. "Look, Steve, about that time up on the ship in the pump bay. I, er... I--". "Junk?!" Hoover's lights blazed crimson in unison. "What do you mean, funk? I'll have you know, young man, that we stock the finest quality and the widest selection on the Peninsula. And we do it with the smallest inventory overhead and the fewest out-of-stock problems of any establishment of comparable size. Junk indeed! Have you troubled to inspect our--". evening? THE COFFEE HAD SIMMERED long enough to turn slightly bitter. By the time she sampled her third. "That's right." Bernard was surprised and felt a little flattered. "I help look after the main drive systems." Putting the pasta salad in the fridge, Leilani said, "Is that what you're doing? Talking around what you. Lechat nodded and seemed satisfied. "That gets us up there," he said. "Now what about getting into the Communications Center?" Whip-quick, the woman snapped her head up, blond tresses lashing the air. Her face, half revealed in. Colman grinned. "Okay, chief. I will." A short silence fell while they both thought about the same thing. "How long do you think it'll be?" Colman asked at last. "She's a juiceless bitch, isn't she?" contention. "No. It'd be your solution, not mine." "Then that's the answer." lay nodded, straightened his arms into his pockets with his shoulders bunched high near his ears, held the posture for a few seconds, and then relaxed abruptly with a. This evening wasn't about Micky Bellsong, anyway, not about what she wanted or whether she was. "So maybe we'll see you down there sometime," Ci said. Bernard acknowledged with a nod and leaned forward to speak in a low voice to the face that had appeared on an auxiliary screen. "This is urgent, Admiral. Make sure that all the sky-roof outer shutters are closed immediately." was.
