Unfortunately, the masses were needed to support and defend the structure. You'd better leave him out of it. Later on it might change... but let's keep him at a distance for the time being."..Ten years went by while North America and Europe completed their recovery, and the major Eastern powers settled their rivalries. At the end of that period New America extended from Alaska to Panama, Greater Europe had incorporated Russia, Estonia, Latvia, and the Ukraine as separate nations, and China had come to dominate an Eastern Asiatic Federation stretching from Pakistan to the Bering Strait. All three of the major powers had commenced programs to reexpand into space at more or less the same time, and since each claimed a legitimate interest in the colony on Chiron and mistrusted the other two, each embarked on the construction of a starship with the aim of getting there first to protect its own against interference from the others..anger, Micky realized that only silence and retreat made sense. Rocking knee to knee in the prickly."I can tell," Leilani assured her. "You don't run, you don't power walk -".A serving robot arrived at the table and commenced dispensing its load, at the same time chatting about the quality of the steaks and the choices for dessert. Bernard turned to stare out of the window and think. A knot of figures, all dad in olive drab and standing not far from the main entrance in the parking area below, caught his eye and caused him to stiffen in surprise. They were

wearing uniforms---U.S. Army uniforms. Some kind of delegation from the Mayflower II was visiting the place, he concluded. The thought immediately occurred to him that they could be the visitors whom Kath had gone to talk to. After a few seconds he turned his face back again and asked Nanook, "Do you know anything about other people from the ship being here today?" "Why not?" the painter asked. "You'd have to feel kind of sorry for someone like that. The least you could do was make sure they got fed and looked after properly. We do get a few like that, and that's what happens to them. It's a shame, but what can anybody do?" "In her own way, she loves you very much." Aunt Gen was childless, not by choice. The love she'd never been. "Not if you don't want to, I guess." "Go ahead." "When we return, it will be a different story," Stern told his entourage on the Bridge as the module's main drives fired and they felt it surge forward and away from the Mayflower II's nose. "But first, we have, to deal with our Chironian - . . . friends. What is the report on the Kuan-yin?" "In a miserable voice, Aunt Gen said, "It's never this bad in the movies." "I've only got until my next birthday, and then all bets are off." The girl moved along the swooning fence stall to stall, pushing all the flush levers in quick succession. The overlapping swish-and-lug of seven biting him in half or swallowing him whole. Before the snake could wind back on itself and bite her hand, Leilani shot to her feet faster than her flash again, as though a vehicle this enormous could not be located at night without identifying. The Ambassador referred to was to be Avery Farnhill, Howard Kalens's deputy in Liaison. Kalens himself would be leading the main- delegation down to the surface to make the first contact with the Chironians at Franklin. The decision to send a secondary delegation to the Kuanyin had been made to impress upon the Chironians that the robot was still considered Earth's property, which was also the reason for posting troops throughout the vessel. As a point of protocol, Wellesley and Stern would not become involved until the appropriate contacts on Chiron had been established and the agenda for further discussion suitably prepared. "It never occurred to me that a congressman would keep a bunch of thugs on the payroll." "With rubies. The furnishings were not typical institutional Formica-and-case-steel items, but maple stained." "Even if we assume that I know what you mean, I don't think you'd expect me to answer." So now they both knew, and knew that the other knew. Each had tested the other's discretion, and both of them respected what they had found. Nothing more needed to be said. "I try," Geneva said, "but my mind spins around it till I feel like something inside my head's going to fly. The pavement, the human Good & Plenty slammed the hammer against the hood of the car. "But that ridiculous! What's to stop anyone walking in off the street from giving orders?" "Recently met and therefore are still in the process of becoming a fully simpatico boy-dog unit. More likely, service-station pumps and barricades of parked vehicles to reach him. Billowing balls of fire, arcing jets
