"Sarge, wake up," the Voice of Judgment boomed from above, sounding uncannily like Stanislaw. "Hanlon wants you over at the main gate." Leilani wasn't able to act on her own good advice. Lechat told Fulmire that he no longer thought it advisable to attempt setting up a Terran community alongside the totally unfamiliar experience of Franklin—at least, not immediately, The Terrans would need time to readjust, and in the meantime they would cling to their Own familiar ways and customs. The proximity of Franklin would only cause tensions. Lechat believed, therefore, that the migration to the surface should be halted completely, the existing plans abandoned, and a new Terran settlement established elsewhere for the transition period. An area called Iberia, on the south coast of western Selene, would be a suitable place, he thought. Lechat didn't know what would happen after that and doubted very much if anything could be predicted with confidence, but for the nearer term it would be the answer both to giving the general population a chance to settle in without disruptive influences, and the extremists an opportunity to cool down and do some more thinking..with a patina of perspiration. She knew damn well they had to stay there..Lechat cut him off with a wave of his hand. "Don't make any noise," he said to the whole group, who were crowding around in astonishment. "Everything is okay!" He signaled Borftein over with another wave of his hand. Over by the door the soldiers had dragged in two unconscious guards, and two of them were already putting on the SD uniforms while the steward handed them two automatics, which he produced from inside the napkin he was carrying. "There isn't a lot of time," Lechat advised Wellesley and Borftein. "We have to get you downstairs and into the Communications Center. I guess I couldn't have been listening that much."..Jay sat at an empty booth while Colman collected two coffees from the counter, then inserted' his Army pay-card into a slot. In a lot of ways lay reminded Colman of himself when he was a lot younger. Colman had acquired his name from a professional couple who adopted him when he was eleven to provide company for their own son, Don, who was two years older. They hadn't wanted to disrupt their careers by having another child of their own. Colman's stepfather was a thermodynamics engineer involved with heat exchangers in magnetohydrodynamics systems, which accounted for Colman's early interest in technology. Although the Colmans had done their best to treat both boys equally, Steve resented Don's basic schooling and was jealous when Don went to college to study engineering, even though he himself had then been too young to do the 'same. The rebelliousness that" had contributed to Steve's being placed in the home for wayward adolescents from which he had been adopted reappeared, resulting in his giving the couple some hard times, which upon reflection he felt bad about. For some reason that Steve didn't understand, he felt that if he could help Jay realize his potential and use the opportunities he had, it would make up for all that. Why, he didn't know, because nothing he did now could make any difference to the Colmans, who were probably old and gray somewhere, but he felt he owed it to them. People's minds worked like that. Minds could be very strange..It seemed that his head had hardly touched the pillow when a concussion shook the room and a booming noise in his ears had him on his feet— before he even realized that he was awake. More explosions came in rapid succession from outside the building, followed by the sounds of shooting, shouting voices, and running feet. Seconds later a siren began wailing, and the speaker in the room called, "General Alert! General Alert! A breakout is being attempted from the Detention Wing. All officers and men report to General Alert stations."..Once, when an outlaw mouse scurried from room to room and along hallways, eluding a comic posse of..Kath's pocket communicator buzzed, and she took it out to answer. It was Adam, who had heard the news and was checking to make sure that she and Colman were all right. Colman left her talking and moved over to where Anita was standing near the door on the fringe of the party assembling to depart. "Why'd you ever get mixed up with that bunch?" he murmured. "Wise up when it's all over. Get out of it."..waited neither a lady nor a tiger, but an altogether unique specimen. Leilani would have preferred the little gravy. We'll put it in a takeout dish, and give it to you for nothing because we just love doggies..Like any mature realist, Borftein had come to terms with the regrettable truth that on occasion the plans and stratagems which he approved would result in fatalities, as often as not in agonizing and horrifying ways, but he had learned to "objectivize his perspective" with the detachment required by his profession. The numbers of killed and wounded predicted for an intended operation were presented by his analysts as—the "Loss Factor" and the "Combat Reduction Factor," respectively; a city selected to be incinerated along with its inhabitants was "nominated"; an area drenched with napalm and saturated with high explosive was subjected to "exploratory aggressive reconnaissance"; and a village flattened as a warning against harboring insurgents became an object of a "protective reaction." Such were the rules..grass extended from one side of the lot to the other, but it provided a scant twelve feet of turf between..Even as Noah dropped the ruined cake, the front passenger's-side window shattered under the impact. "You're what?"..refrigerators, sinks, and preparation tables, all stainless steel, gleaming and lustrous, provide him with a..Cliff Walters would never have gotten himself into a stupid situation like that. So what if Walters did sometimes turn a blind eye to little things that didn't matter anyway? Walters was a lot smarter when it came to the things that did matter. So much for Fallows, the smartass kid shuttling up from Arizonian to save the universe, who still hadn't learned how to keep his nose clean. Cliff Walters had earned every pip of his promotions, Fallows conceded as part of his self-imposed penance; and he had earned every year of being a nonentity on Chiron that lay ahead'. Someday, maybe, he'd learn to listen to Jean..And therefore the Chironian rejected the death-cult of surrender to the inevitability of ultimate universal stagnation and decay. Just as an organism died and decomposed when deprived of food, or a city deserted by its builders crumbled to dust, entropy increased only in closed systems that were isolated from sources of energy and life. But the Chironian

universe was no longer a closed system. Like a seedling rooted in soil and bathed by water and sunlight, or an egg-cell dividing and taking on form in a womb, it was a thriving, growing organism- an open system fed from an inexhaustible source..have been: so free of anger and self-destructive impulses..barefoot in the crisp dead grass..A few seconds later Lurch, the household robot--apparently an indispensable part of any environment on Chiron that included children--appeared in the doorway. Colman asked..But without a steady supply of new converts to sustain it, the enthusiasm of the politically active early years of the voyage had waned. For a while she had absorbed herself in a revived dedication to her original calling by attending specialist courses in the Princeton module on such subjects as gene-splicing, and extending her activities later to include research and some teaching at the high-school level. Her research work at Princeton and her teaching had brought her into contact with Jerry Pernak, who was in research, and Eve Verritty, who had been a junior administrator with the Education Department at the time. In fact it was Jean who had first introduced them to each other..Celia nodded. "That evening, as soon as I got up to the ship. I think I must have been hysterical or something. Okay, let's get the hell out."..The plasma emerged from this primary process with sufficient residual energy to provide high-quality heat for supplying a hydrogen-extraction plant, where seawater was "cracked" thermally to yield bases for a whole range of liquid synthetic fuels, a primary-metals extraction and processing sub complex, a chemical-manufacturing sub complex, and a desalination plant which was still not operational, but anticipated large-scale irrigation projects farther inland in years to come..Nanook shifted his eyes and shook his head again. They've all got eyes, ears, and brains."..Chang laughed. "It's okay. We won't be going very high, and it'll be more walking than anything else. There won't be anything more risky than maybe a few askrends showing up."."They wound it up early. Anyhow, Bud told me it'll be open again tomorrow. Check it out and give it a try."..Downstairs, Maddock drifted through the house and positioned himself outside at the front to watch for the flyer that would be bringing Celia from the shuttle base; the others made their separate ways out through the rear and rejoined Colman inside the personnel carrier minutes later. They settled themselves down to wait, and Fuller and Canon lit cigarettes. "Still think it'll go okay, Sarge?" Stanislaw asked. "I could do a quick hair-job in there." He had brought the things with him, just in case..Jarvis scanned the screen on the far side of the post. "The fighting at Vandenberg looks as if ifs being contained," he announced. - "Two pockets of our guys are holding out at Bays One and Three, but the rest are cooperating with the regulars.
