Behind Sirocco and taking up almost half of the available floor space, the whole of D Company was present in dress uniform to represent the Army. Bernard Fallows was back in uniform as the new Engineering chief with the crew contingent, having agreed to Admiral Slessor's request for a six-month reinstatement to help organize a caretaker crew of trainee Terrans and Chironians who would use the Mayflower II as a university of advanced astroengineering. Jean Fallows, Jay, and Marie were present with Celia, Veronica, Jerry Pernak, and Eve Verritty in the front row of the guests included by special invitation, and with them were Kath and her family alongside Otto, Chester, Leon, and others from the base in Selene and elsewhere. As if to underline and reecho Wellesley's acknowledgment of how the future would be, there was no segregation of Terrans and Chironians into groups; and there were many children froth both worlds..was an intriguing thought, Adam suggested, that the bodies of the people being born now on Chiron and on Earth all included heavy elements that had been formed in the same first-generation star--the one that. had triggered the shock wave when it exploded a~ a supernova. "We might have been born light-years apart," he told Colman. "But the stuff we're made of came from the same place."..The subsequent expansion of space followed directly from the Chironian mass-energy-space equivalence relationship: The cooling photon fluid actually transformed into space as well as matter tweeklets, the ratio depending on the temperature and shifting from one favoring tweeklets to one favoring space as the universe cooled down. Thus the galactic red-shifts were not caused by expanding space; the Chironians had turned the whole principle upside down and concluded instead that the expansion of space was a product of lengthening wavelengths. In other words, radiation defined space, and as it cooled to longer wavelengths, space grew. Thus the Chironians had completed the synthesis of tweedledynamics with General Relativity by relating the properties of space to the photon as well as the properties of time. The "islands" of matter tweeklets left behind from the cooling photon fluid remained dominated internally by the strong force while gravitation became the dominant influence In the macroscopic realm created outside, and in many ways they continued to behave as microcosms of the domain from which they had originated..Chevrolet Camaro that whiffed and wheezed worse than a pneumonic horse, and a past that wound."Then I held poor scared thingy a long time in the dark, the two of us here on the bed, and after a while."Does Casey know?" Colman asked. Veronica shook her head. Colman thought for a few seconds. "I don't like the sound of what's going on around there," he said. "Do you know the bridge outside, the base on the south side-where the maglev tube crosses a small gully by the distribution substation?".I was very young. I'm not sure I can remember without checking the records. Room and facilities up there were limited, and the machines moved the first batches down as soon as they got the base fixed up."."What an impressive name," Geneva said.
